

QUICK RELEASE COUPLINGS

These quick release couplings are specially designed to give the diver easier mounting of equipment. The smaller size, CDQR2, (115mm) is mainly used to mount pony tanks and/or torch battery housing. The larger size, CDQR1 (270mm) can also be used for carrying larger tanks. The female half of the coupling has slots to enable the BCD belt to be threaded through. This remains on the jacket belt so that when removed it returns to the same position when refitted to the main tanks. The male half is attached to the tank or battery housing with two bands which are supplied with the couplings. To fit, simply sleeve one in to the other and lock off by fitting the locking pin. The materials used are stainless steel.

CODE	DESCRIPTION
CDQR1	QUICK RELEASE COUPLINGS 270MM COMPLETE
CDQR2	QUICK RELEASE COUPLINGS 115MM COMPLETE
CD-RC	R- CLIP QUICK RELEASE COUPLINGS
CD-HC1	HOSE CLAMP 11 X 800 MM
CD-HC2	HOSE CLAMP 11 X 410 MM
