

## SOFNODIVE 797

### SofnoDive 797, Pre Packed Absorbent Unit (2 Pcs)

A disposable absorbent unit, SofnoDive 797 absorbs carbon dioxide ensuring a breathable atmosphere is maintained. It is optimised for the removal of carbon dioxide from recirculated air/nitrox/heliox in rebreathers and saturation dive systems. SofnoDive 797 is a single use, pre-packed carbon dioxide absorber intended to be used as part of a closed circuit diving rebreather system. The units are simple to use and a cost effective alternative to loose fill absorber units.

SofnoDive 797 is approved for use with Poseidon rebreathers.  
1mm - 2.5 Granules.

Bulk buy discounts are available please contact [info@customdivers.com](mailto:info@customdivers.com)

Each box contains two SofnoDive 797 cartridges.

1 to 4 Rate (2Pcs) (POA) each. + p&p
